

Strings Assignment

1. Write a program to accept a String from user and display the length of the string. Also display the string in uppercase and lowercase and check whether it is a palindrome or not.

2. Write a program to accept the string from the user and count the number of vowels and consonants in the given string?

3. Write a program to create the class with

firstName

middleName

lastName

When you call the display() it should display full name with '-' separator.

Example:

firstName ="raj"

middleName="kumar"

lastName="k"

output:" raj-kumar-k"

4. Write a program to search for a string in a given group of strings?

String s ="miani,lakshman,java,malli,narayana";

searchString sc="narayana"

output : found at position 4

5. Write a program to find the

1. No. of letters

2. No. of digits

3. No. of whitespaces in the following input.

Input: "I am in Bangalore my house number is 6 and my phone no. 9632133889"
